NOVATOP

For an architect, NOVATOP is a unique material – it is not merely a mass defined by edges and surfaces, but a living entity with its own memory and character. It forces you to think differently – more sensitively. The moment you start working with it, you'll understand that designing with wood panels isn't purely a technical discipline, but a dialogue with the material itself.

WOOD, CRAFTSMANSHIP & DESIGN NOVATOP

The wood you see and feel

Ⓐ Pascal Flammer Ⓕ Ioana Marinescu Ⓒ CH

Authentic, visually clean solid wood.
High dimensional stability and long term resistance to cracking.
Material continuity from walls, ceilings, and floors all the way to doors, furniture, and architectural details.

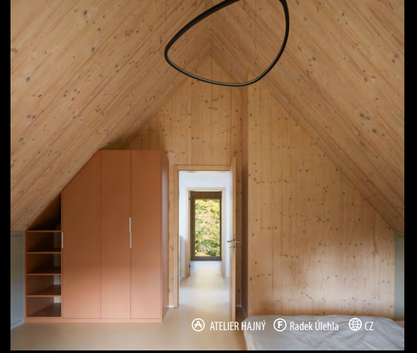

Precision in every detail

Freedom in designing.
Clean details – machining with millimetre precision.
Integrated installations – distribution systems recessed into panels during manufacturing without disrupting the visual surfaces.

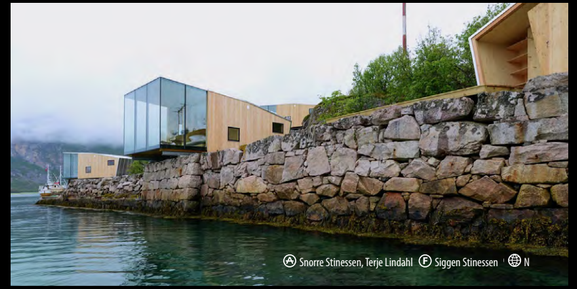

Generous structural solutions – high stiffness and stability.
Spans of up to 10 meters with continuous lamellas.
Large roof overhangs without the need for additional structures.

We approach each project individually.
We integrate our designs flexibly into manufacturing solutions.
We provide expert consultations on the feasibility and optimization
of designs in terms of fire safety, structural engineering, and acoustics.

Prodesi / Denesi BoysPlayNice SK

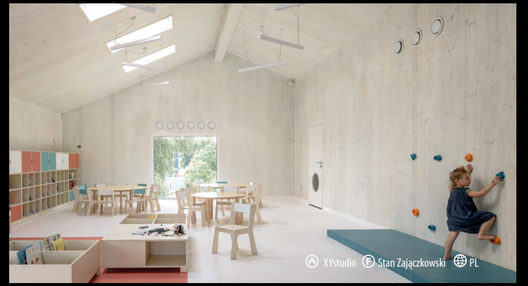

Acoustics, as an integral part of the design, significantly influences user comfort.
Physical acoustics.
Sophisticated structural solutions with a high degree of prefabrication.
Room acoustics.
Wooden acoustic panels with high sound absorption, naturally complementing the architectural expression of the interior.

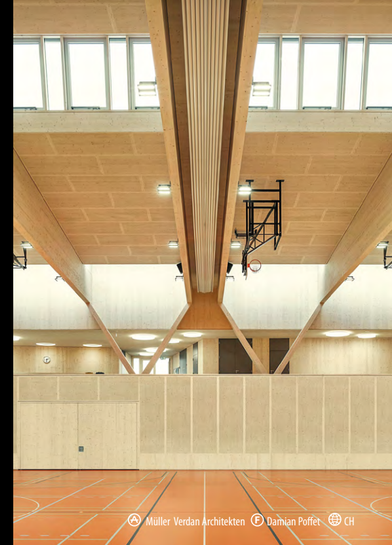

Just listen to the beauty

Studio Perspektiv Ondřej Pavlačík CZ

Spaces that represent.
Spaces for education and community life.
Spaces for sports and multipurpose use.

NOVATOP surface portfolio

1 Spruce
2 Silver fir
3 Brushing – highlighted wood structure
4 Douglas fir
5 Altholz – vintage wood
6 ThermoWood® Lunawood – treated with heat and steam
7 Deep Charred® Ennobled – charred with fire
8 Natural veneers glued to SWP/CLT
9 Metallic facade glazing paints
10 Milled profiles
11 Drilled profiles

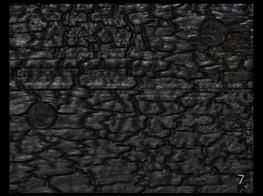

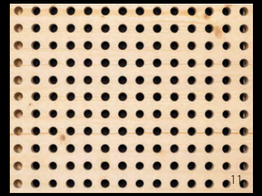

Ptení © Julius Filip

Our strategy is based on high quality, flexibility, and a collaborative approach to meeting the individual needs of our customers. Each product is carefully processed to meet the highest quality standards – and we perform final inspection on each one in person.

Annually, we bind more than 22 million kg of CO_2 a year; it corresponds to approximately 147 million kilometres of a car journey. Sustainability is not just a word for us. It's the way we work, think and live.
